Hundreds of people have the Grippe who do not know it. Not necessarily the final stages, but the first stages. They feel pains in the head, and a bad taste in the mouth, get tired and despondent, have chilly sensations, limbs and muscles ache. In some cases these things are overlooked. In most cases perhaps they are considered simply a slight cold. In nearly every case they indicate the coming of Grippe. There is but one thing to do when these symptoms appear, and that is to take prompt and vigorous measures, to fortify nature to repel the snemy. A little well nirected effort at just the right time will accomplish very much more than labored efforts afterwards. There is but one thing to be done, and that is to use a perestimulant, something that will promptly arrest, and in no way injure, something endorsed by scientists, recommended by physicians, and popular because so efficient.—Duffy's Pure Mait Whisky. Two years ago and last year when the Grippe was raging, this was the stancard reasedy used and recommended by the profession. It did more to prevent the Grippe than all other known or recommended remodes. It preserved many people in health who would otherwise have been graviously sick, perhaps even worse. It is as efficient to day as ever. It should be borne in mind that other so called whiskies may not be so efficient, and if any dealer asserts that such whiskies are the same, distrust him at once. There is but one medicinal whisky, and that is Duffy's Pure Mait.
